

Professor Bob Stone awarded MOD Chief Scientific Adviser (CSA) Commendation

Professor Bob Stone

The MOD's Chief Scientific Adviser, Prof Mark Welland, recently recognised Prof Bob Stone's work on the Human Factors Integration Defence Technology Centre with a CSA Commendation. Prof Welland presented Bob with a certificate and a medal at a ceremony in MOD Main Building attended by many esteemed colleagues from across the Science & Technology Community. Bob's award specifically recognised his achievements on the HFI DTC projects - [EODSim](#) and [SubSafe](#).

The CSA citation noted that:

“Bob Stone of the HFI DTC has made an outstanding contribution to Defence in the development of simulation and serious games systems to supplement training, and has demonstrated the art of the possible for defence simulation to meet urgent training requirements. Drawing on the best in academic thinking Bob and his university team have designed and developed a number of solutions in response to operational needs, contributing in kind much of their own time and resource.

Prof Welland also recognised “that Stakeholders cannot praise Bob's work more highly and are greatly supportive of his approach to engaging key stakeholders to ensure that his work is directly relevant to their challenges and can be readily exploited.”

Congratulations to Bob on this achievement.
